

This Month's Meeting

Computer Forensics

The September meeting of the ISACA Kettle Moraine chapter will be held on Wednesday, September 8, 1999, at the Country Inn in Pewaukee, Wisconsin. Registration is at 2:30PM with the session beginning at 3:00PM. Make your reservation for the meeting with Brian Treinen by e-mail at <mailto:brian.m.treinen@jci.com> or via phone at (414)228-2680. The cost to attend the session is \$15 for chapter members and \$20 for non-members.

Computer Forensic Services (CFS) is the sexy part of information technology, filled with excitement, mystery and intrigue. Computer Forensics examines electronic media to uncover the hidden and deleted information that identifies bad people, doing bad things. Computer forensics has successfully identified hackers stealing millions of dollars worth of goods and services, high tech criminals stealing credit cards and money over the Internet and personnel sending harassing email. The most publicized use of computer forensics is the introduction of Microsoft email during the ongoing federal anti-trust trial. CFS not only uncovers the hidden relevant information but maintains the evidentiary nature and integrity of the original data. Lastly, the Computer Forensic Specialist can offer expert testimony regarding how the information was developed, the chain of custody and the significance of the findings. This provides the decision-maker with all feasible remedies, such as criminal prosecution, civil litigation or administrative action.

Our speaker, Thomas Varney is Ernst & Young's Lake Michigan Area Leader of Computer Forensics Services. Thomas is a Multilingual Executive with global experience in developing, implementing and managing computer network security; forensic analysis of computer data; and initiating risk management strategies. He has over 12 years international experience in investigations and computer security, with over 8 years directly involved in the rapidly evolving field of computer forensics and high technology crime. He is a recognized leader in computer forensics and has been at the forefront of breakthroughs in computer and high technology investigations. Additional information on Mr. Varney is available at our web site at <http://www.execpc.com/~isaca-km/varney.htm>

- submitted by Randall Augsburger (414)223-7149

Meeting Details

When: Wednesday, Sept. 8
 2:30PM Registration
 3:00PM Session
 4:00PM Cookie Break
 5:00PM Session Ends
 5:05PM Social Hour-Bar

Where: Country Inn Hotel
 2810 Golf Road
 Pewaukee, Wisconsin

Cost: \$15 Chapter Members
 \$20 Nonmember

For Reservations Contact:

Brian Treinen
 Johnson Controls, Inc.
 P.O. Box 3050
 5757 N. Green Bay Ave.
 Glendale, WI 53209
 (414)228-2680

E-mail: brian.m.treinen@jci.com

When registering, indicate your name, company name, and member/nonmember status. Reservations must be received by 12:00PM Monday, September 6. No cancellations will be accepted after the reservation deadline.

No shows will be billed!
